**Concealed black anodized aluminium shadow-gap profile suitable for drywall and masonry**

Delivery and installation of the concealed black anodized aluminium profile for shadow-gap with protection foil, including connecting straps for a proper conjunction of the single profiles.

The profiles are fixed vertically and horizontally to the substructure or on the first layer. The second layer will be put on the aluminium profile and well bolt with self cutting screws. For masorny the profiles are fixed to the substructure using an appropriate mounting foam and screwed to the wall.

The height will be defined by the construction management.

For plaster board: 12,5mm

and/or standard plaster depth: 15mm

.....metres .....
