Concealed hollow-chamber aluminum profile suitable for drywall measured with inches

Delivery and installation of the concealed aluminum profile for shadow gaps, including connecting straps for a proper conjunction of the single profiles without getting any visible edges.

The pre-drilled profiles covered with a protection foil are fixed vertically and horizontally to the substructure or on the first layer. The second layer will be put on the aluminum profile and well bolt with self cutting screws. The height will be defined by the construction management.

Suitable for gypsum board of 1/4", 3/8" 5/8"
Visible depth of the skirting board: 3/8"; 5/8"

Concealed hollow-chamber aluminum profile:
