

Tender specification

wall flush skirting board Z10 drywall

OZ	Item description	Quantity Qty	Individual amount in EUR	Total amount in EUR
----	------------------	-----------------	-----------------------------	------------------------

Concealed hollow-chamber PVC profile suitable for drywall

Delivery and installation of the concealed aluminum profile for flush skirting boards, including connecting straps for a proper conjunction of the single profiles without getting any visible edges.

The first and second layers of planking are completed, with the second layer set higher according to the construction manager's instructions. On the first layer of planking, the profile—which has been coated with double-sided adhesive—is glued horizontally, and on the second layer, it is stapled in place. Height alignment is performed as agreed with the construction manager.

- Suitable for gypsum board of 10 mm
 - visible height of skirting board: approx. 60-80 mm
 - Suitable for skirting boards made of wood, ceramic, or the ready-made cover profiles as part of the Click IN system
- See the installation video:
