Block frames in aluminum for inswing and outswing doors

Number of panels:

Basic dimension:

Clearance dimension:

Wall thickness:

Profiles in raw untreated aluminum alloy EN EW-6060 with beveled angles for a perfect edge formation and to guarantee a filigree shadow gap, incl. support of the snap-in mesh to avoid wall crackings, suitable for solid and dry construction. This creates a secure connection between the door frame and the masonry or drywall, thereby preventing hairline cracks from forming. For both standard and floor-to-ceiling doors.

Door leaf thickness:mm

Installation point:

Door no.:

Block frame for inswing and outswing doors

AGS-systems srl, TB40 profile
